

ARTIST STATEMENT

All my life I have been fascinated with the beauty and intricacies of the natural world. As a scientist I have a deep desire to help conserve and protect the delicate ecosystems on which we all depend. As an artist I wish for my works to help inspire and educate others to develop a respect and greater understanding for the natural world in which we live. I believe that the subjects of my art speak for themselves. It is my challenge to help those subjects reveal their unique characteristics or behaviors in an informative and thought-provoking way.

EDUCATION

Certificate in Natural Science Illustration, University of Washington, Seattle, WA, June 2007.

Bachelor's of Arts in Art/Computer Art, State University of New York at Oneonta, Oneonta, NY,
